EXPERIENCE

AI Engineer / Technical Lead — Current

Jan 2022 – Present · 4y 9m

aunoa

- Platform owner: product planning and architecture of an omnichannel AI-powered customer service solution.
- Integration of generative AI APIs (OpenAI, HuggingFace, custom models) into production conversational flows.
- Design and implementation of an LLM adapter with RAG, validated in production with outstanding results.
- R&D projects: customer service in the metaverse with Decentraland, multimodal model exploration.
- MLOps, CI/CD with Jenkins and Kubernetes. Stack: Node.js, Python, PHP, Angular — distributed and microservices architecture.

Software Engineer — Backend Lead

Feb 2022 – Oct 2022 · 8 months

EqualComp

- Project kickoff from scratch in a two-person team: full architecture design, database modelling and complete backend development.
- Infrastructure setup, CI/CD pipeline with GitLab and Docker.

Tech Lead / Software Engineer

Apr 2019 – Dec 2021 · 2y 8m

Lãberit

- Technical lead on the Decidim project for Valencia City Hall: direct client contact, requirements gathering, platform setup and deployment.
- Tech Lead of a team of up to 10 people (juniors, seniors and interns): task organisation, reporting to PM and technical coordination.
- Department Release Manager: responsible for all deployments, CI/CD management with Kubernetes and Swarm alongside the DevOps team.
- Digital transformation projects for Public Administration: Generalitat Valenciana and Valencia City Hall.

Software Engineer

Jul 2018 — Apr 2019 · 9 months

Smart and Fun

- Senior Ruby on Rails development with PostgreSQL on custom software projects for SMEs.
- Django/Python backend on a larger-scale project, with full command of the framework and its ecosystem.
- Frontend rotation with Vue.js and architecture analysis alongside the Tech Lead.

`Ruby on Rails` `Django` `Python` `Vue.js` `PostgreSQL` `GitLab CI` `JavaScript`

IT Manager · Current

Oct 2016 — Present · 10 years

ArtesanAlbums

- Full technology advisory and ongoing technical support: systems, networks, hardware and software.
- Development of a custom web application for client order intake with automatic notification and order sheet printing.
- Corporate website development and maintenance.

`PHP` `MySQL` `Linux` `Networking`

Full Stack Developer

Oct 2014 — Oct 2016 · 2 years

Shopadvizor

- Fullstack development on an international retail platform built on Joomla: PHP and MySQL backend, frontend with HTML, CSS, JavaScript and jQuery.
- Embedded integrations on international retail platforms such as Carrefour France.
- Co-design and implementation of an article search engine based on a custom weighting system.

VoIP Developer / Technical Support

Jul 2013 — Oct 2014 · 1y 3m

VOZ.COM

- Configuration and technical support of physical and virtual Asterisk PBX systems for clients, including complex SIP Trunk connections.
- Evolution into development: new features and integrations in PHP, Bash, MySQL, HTML, CSS and JavaScript on telephony platforms.
- Involvement in the redesign and renewal of the company's own telephony system core.
- Solid grounding in Linux server administration: SSH, SCP, SFTP, jailed environments and advanced command line.

`Asterisk` `VoIP` `SIP` `PHP` `MySQL` `Bash` `Linux`

EDUCATION

Master's in Artificial Intelligence
Universidad Alfonso X el Sabio
Computer Engineering

B.Sc. Computer Science
Universitat d'Alacant
Software Engineering

PUBLICATIONS
